III. DESCRIPTION OF PERMIT ACTION

1. Does the permit action requested involve: a: ☐ Portable Source ☐ Voluntary Emissions Caps
 ☐ Acid Rain Source ☐ Alternative Operating Scenarios
 ☐ Source Subject to MACT Requirements [Section 112]
- b: ☒ None of the options in 1.a. are applicable

2. Is source operating under a Title V Program Compliance Schedule? ☐ Yes ☒ No

3. For permit modifications, provide a general description of the proposed permit modification:

PTO 8240-R8 Condition C.7.(c).ix. currently requires that sampling of the PUC/field gas blend be conducted "immediately downstream of the 2" 150 psi mixing point, prior to combustion in the steam generator" (SG-100, Device ID# 109530). PCEC is requesting that PTO 8240-R8 Condition C.7.(c).ix be revised to require gas sampling at the gas blending skid only (currently operating under an IPAP for ATC Mod 12084-04). PCEC will continue to sample the PUC Natural Gas individually, as required by permit.

The fuel gas for all 4 steam generators (operating under separate permits) is routed through the gas blending skid prior to being combusted. Sampling at the gas blending skid will satisfy the PUC/field gas sampling requirements in PTO 8240-R8 Condition C7.(c) ix as well as the gas sampling requirements for the other 3 steam generators. During a field visit of the Diatomite Project in early November, Brian Kato (SBCAPCD) confirmed that the piping on steam generator SG-100 (Device No. 109530) receives the blended fuel via a single fuel line from the gas blending skid.

*Requires APCD-approved NSR permit prior to a permit revision submittal

8. PROJECT DESCRIPTION

PCEC is applying for a Modification to PTO 8240-R8.

PTO 8240-R8 Condition C.7.(c).ix. currently requires that sampling of the PUC/field gas blend be conducted "immediately downstream of the 2" 150 psi mixing point, prior to combustion in the steam generator" (SG-100, Device ID# 109530).

PCEC is requesting that PTO 8240-R8 Condition C.7.(c).ix be revised to require gas sampling at the gas blending skid only (currently operating under an IPAP for ATC Mod 12084-04). PCEC will continue to sample the PUC Natural Gas individually, as required by permit.

The fuel gas for all 4 steam generators (operating under separate permits) is routed through the gas blending skid prior to being combusted. Sampling at the gas blending skid will satisfy the PUC/field gas sampling requirements in PTO 8240-R8 Condition C7.(c) ix as well as the gas sampling requirements for the other 3 steam generators. During a field visit of the Diatomite Project in early November, Brian Kato (SBCAPCD) confirmed that the piping on steam generator SG-100 (Device No. 109530) receives the blended fuel via a single fuel line from the gas blending skid.

B. If yes, has the lead agency permit application been deemed complete and is a copy of their completeness letter attached?
[] Yes [] No

Please note that the APCD will not deem your application complete until the lead agency application is deemed complete.

C. If the lead agency permit application has not been deemed complete, please explain.

D. A copy of the final lead agency permit or other discretionary approval by the lead agency may be requested by the APCD as part of our completeness review process.
